DSS 1.6.1 Release Notes

This document provides you with the latest information about the Data Steward Studio 1.6.1 release and its product documentation.

What's New in this Release

New features and changes for Data Steward Studio 1.6.1 have been introduced in the DataPlane Platform, along with documentation updates. New features are described in the following sections.

- DSS 1.6.1
 - Ability to select multiple tag rules and update the status accordingly. In the Sensitivity rule list page, you can now select multiple rules / All rules. Options like SUSPEND SELECTED / DEPLOY SELECTED can be used for all the selected rules.
 - Support for pagination on profilers job listing page.
 - Better search capabilities for collections and assets. They are not case-sensitive anymore.
 - Data Analyst role will no longer be able to view Profiler option.
 - The header list (Source, Name, Database Name, Owner, and Created Time) on the Asset listing page will not move or get hidden while you scroll down.

Unsupported Features

This section lists features that are not officially supported by DSS 1.6.1 in a production environment.

Technical Preview Features

The following features are available within DSS 1.6.1 but are not ready for production deployment. Cloudera encourages you to explore these technical preview features in non-production environments and provide feedback on your experiences through the Cloudera Community Connection (HCC).

- Incremental profiling for select metrics on tables

Known Issues

DSS 1.6.1 has the following known issues, scheduled for resolution in a future release. Where available, a workaround has been provided.

Table 1: DSS Known Issues

Bug ID	Summary
DSS-11	Description of problem: When you try to delete an asset filter rule, 500 exception is displayed in DSS app. However, the rule gets deleted. This issue occurs only in DSS installed with HDP 2.6.5 instances. Workaround: Not needed.

Bug ID	Summary
BUG-102459	Description of problem: The widget "Sensitivity Profiler Execution Status" is blank even though the sensitive profiler jobs might have run on this cluster. Details: This is because of a timezone issue and the data will be visible one day after the information is available on the cluster. Workaround: None.
BUG-101588	Description of problem: If an asset collection is created without any assets, we will show the overview page for the asset collection with empty content. Workaround: None.
BUG-101293	Description of problem: Dropped table counts are not captured in the Dashboard widget "Total number of Hive table assets". Workaround: None.
BUG-100916	Description of problem: If an asset collection creation process is incomplete, and the user navigates out of the flow, an asset collection with the same name cannot be created again. A error with a message of 409 is displayed to the user. Workaround: Ensure that the asset collection creation process is cancelled before navigating out of the flow.
BUG-100816	Description of problem: A "Whitelabel Error Page" is observed on accessing DPS/DSS URL. Workaround: Remove any suffixes appended at the end of the url (trying to access) and retry login.
BUG-99841	Description of problem: Asset collection names greater in length than 255 characters do not get created correctly. Workaround: Create names lesser than 255 characters.
BUG-98838	Description of problem: Login of a user on DataPlane fails in case a DSS suffix is appended at the end of DataPlane URL, for eg: https://172.22.86.30/knox/gateway/knoxssso/knoxauth/login.html?originalUrl=https://172.22.86.30/dss/collections Workaround: Remove the dss suffix: /dss/collections and retry user login.

Fixed Issues

The following table lists selected issues resolved in DSS 1.6.1.

Hortonworks Bug ID	Summary
DSS-25	Description of problem: Pagination on Profilers job listing page is missing. Details: The Profiler job list screen list is paginated.
DSS-22	Description of problem: DSS Analyst is able to view the profiler. Details: DSS Analyst role will not be able to view the Profiler option.
DSS-21	Description of problem: Searching for assets in DSS application is case-sensitive. Details: Searching assets in DSS is no longer restricted to being case-sensitive.
DSS-19	Description of problem: Multiple DSS tag rule modification is not possible. Details: Selecting multiple tag rules to change/update the status is now possible.
DSS-18	Description of problem: DSS Analyst User is not able to freeze the view on Data Steward /Asset Collections / Details page. Details: While scrolling the Data Steward / Asset Collections / Details page, the page headers will remain intact and do not move out of the view.
